FORMATIVE ASSESSMENT MICRO-FEEDBACK LOOPS, Using the Student-Centered Accountability (SCA) for Learning Process

Underlying the SCA Process is an instructional approach that links student outcomes with teacher practices. The SCA Process is designed to identify student learning targets/standards, determine related student learning needs, and produce timely, useful, very specific feedback for educators and students. Given feedback specific to identified criteria, teachers have the opportunity to adjust instruction *along the way*, rather than after optimal learning moments have passed.

ENGAGING TODAY'S STUDENTS, What All Educators Need to Know & Be Able to Do

In these two editions of "Engaging Today's Students," we have examined the research around the learner of today, effective teaching practices, and the brain sciences that link to long-term memory and recall. We have observed hundreds of classroom lessons and activities, developed by an array of practicing educators.

A strong indicator for how we organized this book was our deep commitment to learners - students as learners AND teachers as learners - and how we all can learn in significant and sustainable ways. With a central focus on what today's learners require, we have created two editions, one with a focus on College level learners and the other referencing the needs of the grades 5-12 population of students. Each addresses the four essential learning components that drive student engagement.

GRADES 5-12
EDITION

Memory, Recall, the Brain & Learning

Explore ways of incorporating brain-based instruction in the classroom. The power of combining verbal and visual representations into powerful bi-modal memory packets. Over 40 teacher and student generated activities, organizers, templates, and strategies. Improve student performance!

Stock ID: MRBL Price: **\$25**

Brain Based Teaching

Explore teaching and learning through three overarching lenses: How can I "frame" (design) the learning circumstance or activity to INVITE ALL learners, to participate? How can I design the learning experience to CAUSE learner processing - the work required for sustained learning and recall? How do I engineer tasks that create opportunities for multiple PATHWAYS (connections) to be formed for integration, application, & recall?

Stock ID: BBT Price: **\$24**

Coaching Reluctant Learners

This book provides today's middle and high school teachers with the tools they need to ensure classroom success for today's students in a practical framework - unit-by-unit, where both teacher and student can feel more successful. Embedded in this book are proven strategies, activities, examples, and a framework for units that will improve student motivation and performance.

A Mastery Toolkit

Speaking directly to the student, this book explores the foundations of understanding, essential strategies, and learning tools to become motivated, independently engaged in the learning process, responsible for learning, and accountable for making good choices. The goal is to become a "Can Do" Student - a student who takes charge of their learning and empowers themselves in ways to be successful.

Creating & Changing Mindsets

If rational behavior was the basis for human interaction and the mysteries of learning and development were well understood - this book wouldn't be needed. Clear strategies to assist "shifts" in attitude and behavior are included. The question, "will this change last?" plagues us every year. Here's how to impact changes within a month's time... for long-term, sustained differences!
